

Lighter Side of Medicine

HUMOR

TROUBLE ON THE ROOF

Mike and Rob were laying tile on a roof when a sudden gust of wind came and knocked down their ladder.

"I have an idea," said Mike. "We'll throw you down, and then you can pick up the ladder."

"What, do you think I'm stupid?" Rob replied. "I have an idea. I'll shine my flashlight, and you can climb down on the beam of light."

"What, do you think I'm stupid?" Mike answers. "You'll just turn off the flashlight when I'm halfway there."

CAB DRIVERS

Two cab drivers met. "Hey," asked one, "why did you paint one side of your cab red and the other side blue?"

"Well," the other responded, "when I get into an accident, you should see how all the witnesses contradict each other."

A LEAVE LETTER TO THE HEADMASTER

"As I am studying in this school I am suffering from headache. I request you to leave me today."

NEVER BE RUDE TO ANYONE

An American tourist asked a boat guy in Zanzibar, "Do you know Biology, Psychology, Geography, Geology or Criminology?"

The boat guy said, "No. I don't know any of these."

The tourist then said, "What the hell do you know on the face of this Earth? You will die of illiteracy!"

The boat guy said nothing. After a while the boat developed a fault and started sinking. The boatman then asked the tourist, "Do you know Swimology and Escapology from Crocodiology?"

The tourist said, "No!"

The boat guy replied, "Well, today you will Drownology and Crocodiology will eat you. I will not Helpology and you will Dieology because of your Badmouthology."

WHEN I ANSWER THE TELEPHONE

A Psychiatrist was testing the mental status of a patient.

"Do you ever hear voices without being able to tell who is speaking or where the voices are coming from?" asked the psychiatrist.

"As a matter of fact, I do," said the patient.

"And when does this happen?" asked the psychiatrist.

"Oh," said the patient, "when I answer the telephone."

THREE PROFESSIONALS

A Mechanical, Electrical and Computer Engineer were riding together to an Engineering Seminar; the car began jerking and shuttering.

The mechanical engineer said, "I think the car has a faulty carburetor."

The electrical engineer said, "No, I think the problem lies with the alternator."

The computer engineer brightened up and said, "I know, let's stop the car, all get out of the car and get back in again!"

Dr. Good and Dr. Bad

SITUATION: A 39-year-old male with type 2 diabetes but with no maculopathy was scheduled for cataract removal surgery.

LESSON: According to a prospective longitudinal study, cataract removal surgery may positively influence glycemic control and thus quality-of-life in patients with type 2 diabetes without maculopathy. Results in terms of visual and glycemic terms are likely to be better in younger patients.

Curr Eye Res. 2018;43(1):96-101.
